

## **Bermondsey and Lansdowne Medical Mission**

The Practice has 2 sites that are six minutes walking distance. The main site is 10 mins walk from Guy's hospital and London Bridge station. All Doctors and Nurses work on both sites. The IT system is linked so patients can attend either site. It is a good GP practice with a very mixed population of deprivation and wealthy patients. Everyone is very friendly and approachable. There is a daily debrief for all the Doctors at 2.30pm. You work 8 sessions a week which includes a weekly tutorial. The prescriptions and documents are shared amongst all the Doctors including the Trainees which will have less according to where they are at in the training. There is never a problem with leaving in time for VTS teaching. You do not need a car for home visits and there is an Elderly Care Nurse that helps support those patients with high needs. As an ST1 you are not on the home visit rota but you can do visits when you feel comfortable. ST1 is also not on the telephone triage rota either. It is probably on the busier side of GP training. There are 3 or 4 Trainees at the Practice at any one time which is nice for peer support. I would definitely recommend this Practice as it provides good training experience and opportunities. The Practice can be contacted via Lin Clarke, Practice Manager [lin.clarke@nhs.net](mailto:lin.clarke@nhs.net) or Sonia McVinnie, Assistant Practice Manager [sonia.mcvinnie@nhs.net](mailto:sonia.mcvinnie@nhs.net).
