

Hetherington Group Practice

Hetherington Group Practice is situated just a five minute walk from Clapham North tube station. There is a carpark at the surgery if required but it is not necessary to own a car.

The practice is busy but friendly and consists of three partners, three salaried GPs, yourself as an ST2 and and F2. Your supervisor is Dr Steve Mowle. You will feel very supported in the post.

You work every day except Tuesday mornings, which you have off for private study; there is also a weekly half day tutorial with Dr Mowle.

The practice is unique as it operates a total triage system where every single patient that calls the surgery is called back by a doctor who will decide if they need an appointment and who with. As a trainee you do not do this triage system, but it means that you know what the patients are going to be presenting with in all of your clinics, which makes them run more smoothly.
